

Please Read: Drop-Off Instructions

ALWAYS practice **appropriate social distancing**.

ALL gear should be **wiped down** and placed in a **sealed, ziplock bag** prior to placing in a drop-off receptacle.

If possible, drop goggles directly into collecting receptacles without touching it.

Be assured, the collection point person will **wear gloves** and **wash their hands** when handling your donation.

When gear arrives at the medical facility, it will be **disinfected according to each hospital's protocol** and to be used as they deem fit.

If you must touch the collection bin, sanitize or wash your hands!

GogglesforDocs will strive to get the goggles into the hands of those areas most in need.

Remember:

Our hope is that our healthcare professionals get the official PPE they need and that these donations aren't needed.

If they can't, we will work to bridge the gap until they do.

Thanks for your contribution to help during this healthcare crisis.
